

Terramonitor

# World's Smartest Space Data

**Finnish Space  
Industry Days**

4.4. - 5.4.2019

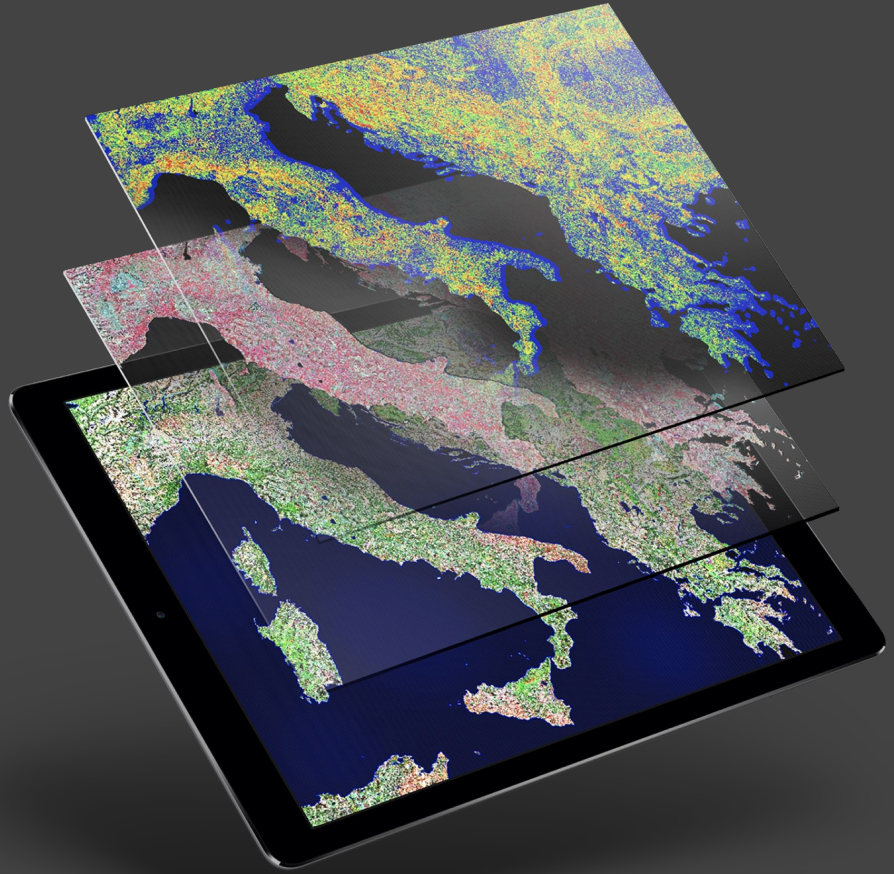

[joni.norppa@terramonitor.com](mailto:joni.norppa@terramonitor.com)

Presentation

# What we do?

- We are a Space Data company
- Terramonitor is a global mapping and analyzing platform
- Terramonitor includes constantly updating 100 million images
- We create Space Data from satellite, remote sensing and multi-data sources

# Reshape your view on the world

Farmers need information about crops vitality

Lumberjacks need to know how many trees are in the forest

Firefighters need to know where the wildfires are

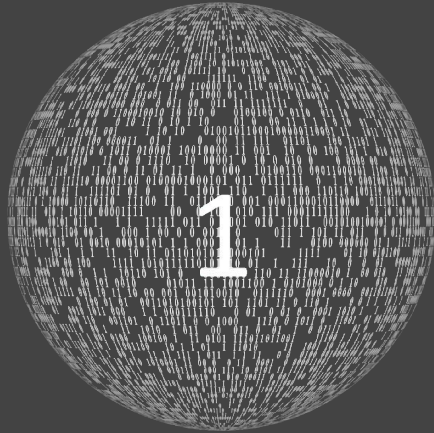

Everyone needs to know how our environment is changing

“Geographical information is outdated and satellite data is hard to access”

“Our mission is to enable access to Space Data for all businesses”

# Dataflow from Space to your screen

RAW Data

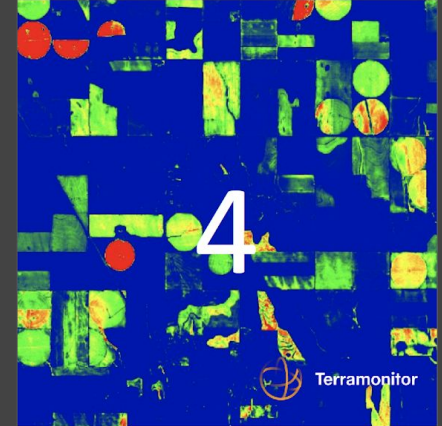

Pre-processing

Visualisation

Analysis

- Automated data collection

- Automated pre-processing

- Global imap assembling

- Analyzing ready layers

Satellite +  
other data

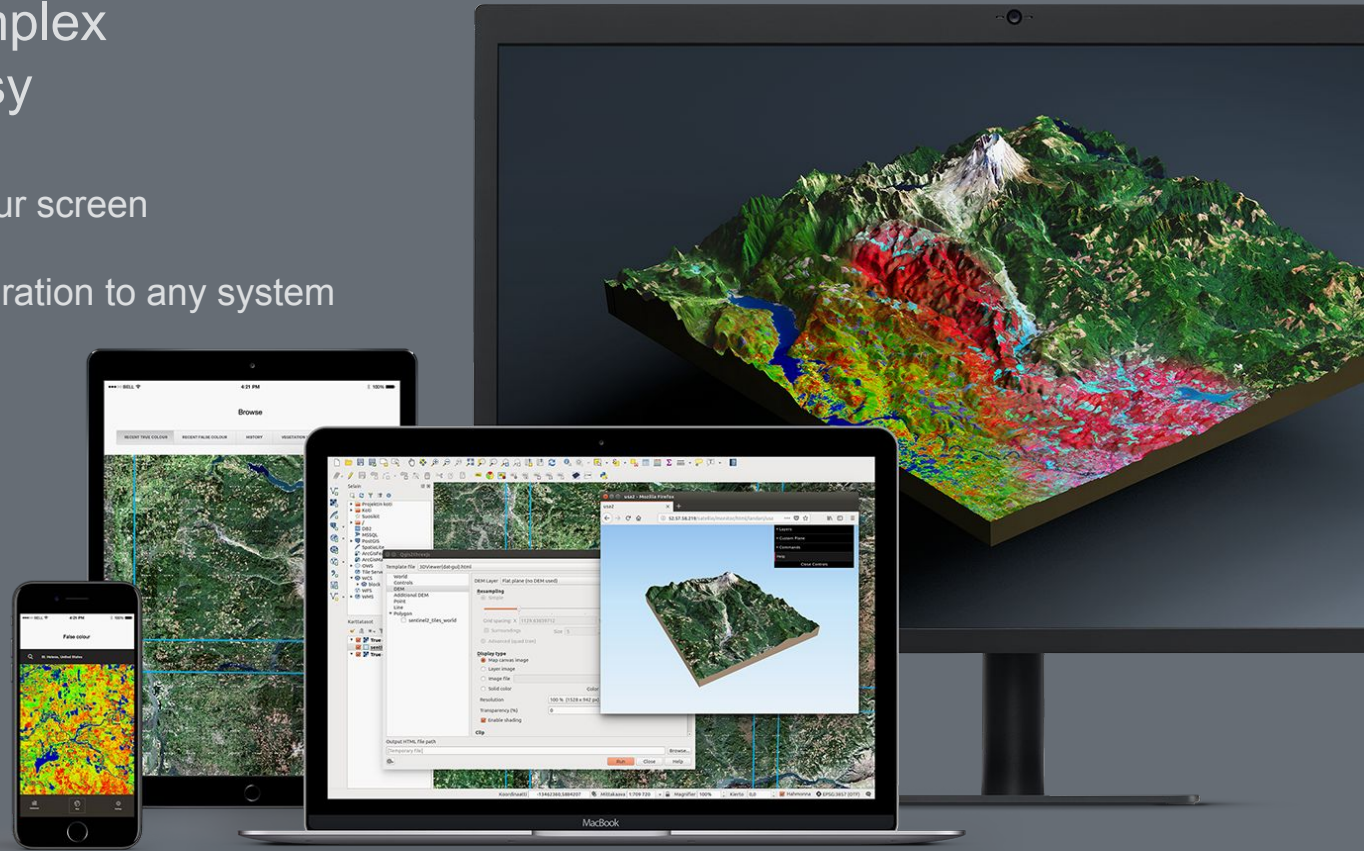

Machine  
learning  
& AI

Space Data

# Space Data is complex but we make it easy

Dataflow from space to your screen

Smart data with easy integration to any system

# Endless Use Cases

Asset management

Climate Change

Law enforcement

Natural disasters

Infrastructure

Forestry

Research

Insurance

Emergency services

Agriculture

Construction

Mapping

Environment

Urbanisation

Logistics
