<https://business.esa.int> @ESAbusinessapps

→ ESA BUSINESS APPLICATIONS OVERVIEW

- ESA Business Applications offers funding for the development, implementation and pilot operations of innovative, viable and **sustainable services** for the benefit of society.
- Business Applications activities require the **integration of at least one space asset** into a service proposition to be eligible.
- These services add value by integrating space assets, such as Telecommunications, Earth Observation, Navigation, and Human Spaceflight technologies, **with existing terrestrial assets and legacy systems** to provide new, **commercially driven solutions**.
- There are also specific funding lines available for Satellite Communications only, which permit the development of technology, products and service applications

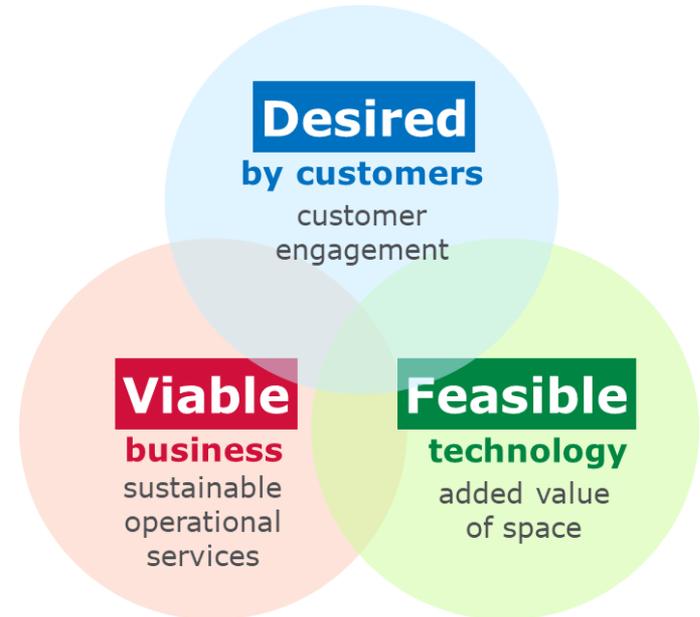

→ FUEL FOR YOUR BUSINESS

Could you be leveraging Space technology and data for the benefit of your business?

→ WHAT WE ARE LOOKING

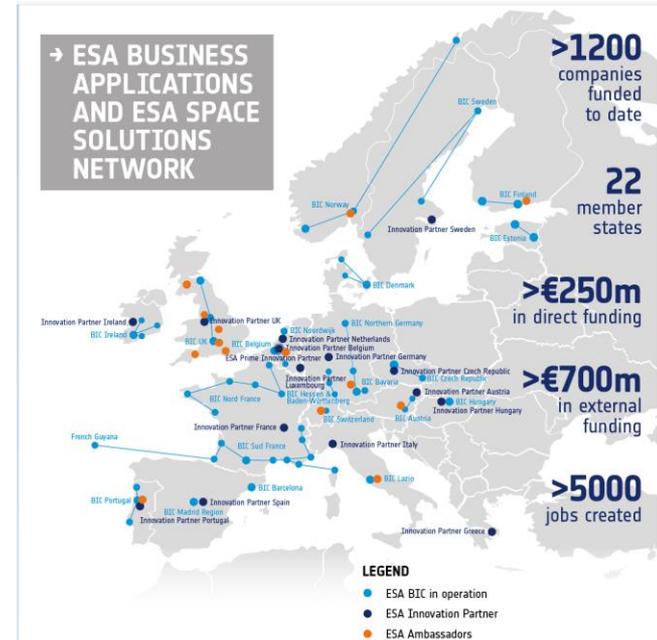

- **Innovative services** that:
 - start from **market demand** – not from technology push
 - are focused on **business development** – not technology development
- **Objectives:**
 - ... to foster utilization of existing space capabilities
 - ... to avoid research / new technology developments
 - ... to work in close partnership with users/customers
 - ... to develop integrated and sustainable services

→ AMBASSADOR NETWORK

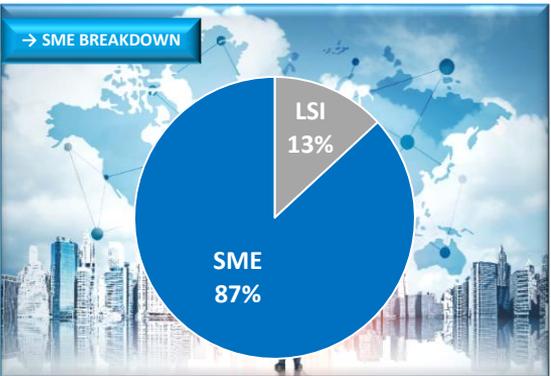

<https://business.esa.int/ambassador-platforms>

- Identification of new **application domains** which might benefit from integration of space assets
- Create **awareness** within relevant stakeholder communities (e.g. authorities, user communities, service providers, industries, research organisations)
- Act as an “**honest broker**” between ESA, industry and the user community
- Closely aligned with ESA BICs and Innovation Brokers
- **Link** users/customers with industries / research organisations
- Stimulate the submission of **ideas and proposals** to ESA’s Downstream Business Application programmes ARTES C&G (Application Segment) and ESA Business Applications.

→ RETURNS AND INVESTMENT

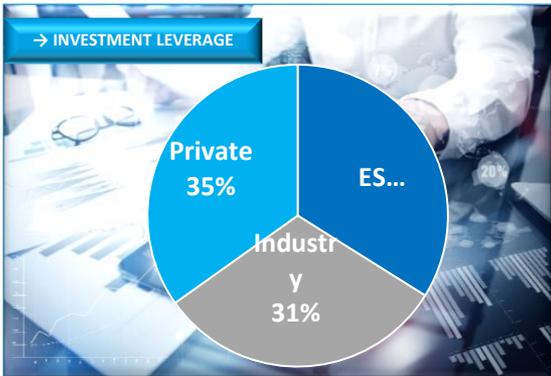

→ ESA BUSINESS APPLICATIONS SOCIOECONOMIC IMPACT

→ ESA PROJECT FUNDING
€127m
