Manufacturing as a Service
Resilient supply chains

Ossi Talvitie, Noux Node

The Technical Challenge

Demand for increased…
- Flexibility
- Connectivity
- Openness
- Degrees of freedom
- Security
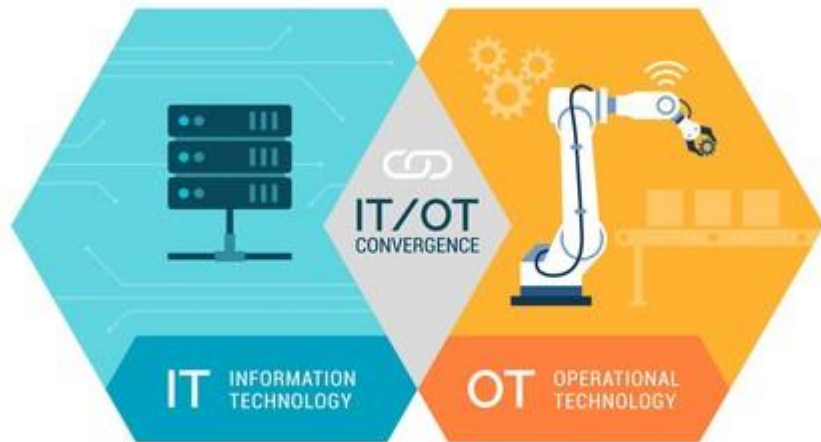

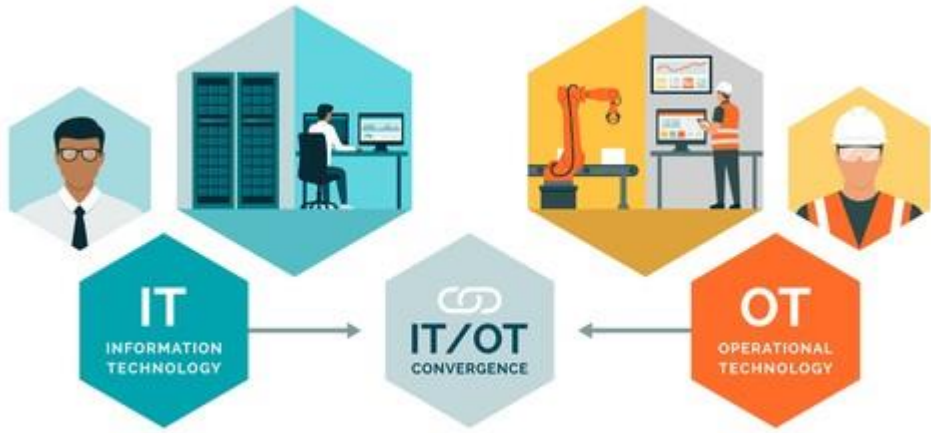

The Business Challenge

Demand for new…
- Thinking patterns
- Business models
- Marketing methods
- Tools
- Supply chain control

The Organizational Challenge

Demand for expertise in…
- Data management

- Integrations

- Data science

- IT Technologies

- … and not only in new but also in existing staff!

Use most suitable hardware	Use most suitable infra-structure	Use right resources for right tasks	
	Micro-service architecture	Professional version handling	Technology independent solutions
Resource monitoring and activity logging	Continuous integration and development	Continuous deployment	
	Container technology		

You can't run a tech company 2023 without knowing the fundamentals of Software industry

You must adapt the best practices of IT into your processes within 2-3 years to be competitive

Thank You!
